THE MASONS ARMS

WINE LIST

'It's not easy being green...'

Well actually it can be!

This environmental wine list is just part of our efforts alongside using our food waste to feed rabbits and chickens (who produce eggs for the kitchen) and create compost for the garden; low energy light bulbs, timers and sensors; recycling glass, paper and cardboard; using local suppliers and growing our own fruit and vegetables; and a switch off policy to reduce wasted energy. Every little helps!

KEY

 Biodynamic	Wines produced from vineyards run considering a method of organic farming that has its basis in a spiritual world-view treats farms as unified and individual organisms, emphasising balancing the holistic development and inter-relationship of the soil, plants and animals as a closed, self-nourishing system.
 Environmental	Wineries that have ISO 14000 accreditation minimise how their operations negatively affect the environment (cause adverse changes to air, water, or land) and comply with applicable laws and regulations.
 Ethically Produced	Where a certain amount from each bottle sold goes back to build schools etc. for the vineyard workers.
 Fairtrade	Fairtrade is a tool for development that ensures disadvantaged farmers and workers in developing countries get a better deal through the use of the international FAIRTRADE Mark.
 Minimal Intervention	Neglect! Leave the vines throughout the season with little or no intervention until harvest.
 Organic	Grapes grown with the use of fertilizers or pesticides that are strictly of animal or vegetable origin.
 Reduce & Re-use	Reducing glass used or using recycled glass leads to less carbon emissions and helps the global shortage.
 Sustainable	Wineries run with minimal use of pesticides and an emphasis on recycle & re-use.
 Vegan	Wines produced without the use of any animal or animal by-product.
 Vegetarian	Wines produced without animal products used in fining process.
